Expand your DocuColor workflow with custom templates

Xerox DocuColor Spire workflow includes basic imposition templates for standard printing of documents, this technology is provided by Ultimate Imposition's Imposition Engine licensed into the Creo Spire workflow. Imposition inSpire expands the capability of your Spire workflow by providing custom template making abilities to handle any type of custom print job that may not fit in existing Spire templates. Imposition inSpire expands your workflow and ensures you get the most value from your DocuColor investment.

Simple and fast custom imposition template making

inSpire is the easiest way to make templates for your DocuColor workflow. inSpire has an automated template making ability that allows you to fold your paper on screen, automatically apply page numbering, fold and cut marks - no more mock ups! Save the templates in a library for re-use with other jobs.

Tested and approved by Xerox & Creo for Spire iGen3 workflow

We build the imposition engine for the Creo Spire for DocuColor workflows, inSpire is simply an extension of this imposition engine - providing more flexibility and options to support your ever evolving printing needs.

Variable data printing support

inSpire is designed for the growing variable data print market, including support for the insertion of variable data on imposed pages. inSpire provides increased flexibility to produce personalized invitations, financial reports or any other one-on-one publishing projects.

Easy upgrade to Imposition On-Demand

An easy upgrade path to Imposition On-Demand ensures that as your print needs expand, we can help you grow to meet new opportunities. Imposition On-Demand for PS and PDF provides more sophisticated imposition workflow and a variety of hands-on and automated imposition workflow features for printing to digital, film and plate devices.

FREE 5 day download demo - Try before you buy!
